

AFSHA NAAZ ANSARI

Software Engineer | AI-Powered SaaS Developer | Full Stack Developer

Kota, Rajasthan, India | +91 82334 83456 | naaz33afsha@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3 years of experience building AI-powered SaaS platforms and scalable web applications. Demonstrated expertise in integrating 30+ third-party APIs — including LLMs (ChatGPT/OpenAI), Stable Diffusion, ElevenLabs, and media generation APIs — into production environments with real user traffic. Skilled in prompt engineering to optimise LLM output quality, and in using AWS S3 for cloud storage of AI-generated media assets. Proficient in PHP, CodeIgniter, and Laravel for backend development; experienced across the full stack including the MERN stack. Proven ability to architect asynchronous workflows, implement role-based access control (RBAC), and deliver end-to-end multi-tenant SaaS products. Seeking a remote or Jaipur/Delhi-based Software Developer role to drive AI-driven product innovation.

CORE COMPETENCIES

• PHP / Laravel / CodeIgniter 3 & 4	• RESTful API Design & Integration	• Generative AI / LLM Integration
• JavaScript / Node.js / React.js	• MySQL / MongoDB / NoSQL	• SaaS Platform Architecture
• AWS S3 / Cloud Storage	• Prompt Engineering / LLM Tuning	• Role-Based Access Control (RBAC)
• FFmpeg / Async Job Queues	• Git / Postman / Agile / Scrum	• Payment Gateway / IPN / SMTP

WORK EXPERIENCE

Software Engineer | Logicbeam Softwares

May 2023 – April 2026

PHP · CodeIgniter 3/4 · Laravel · JavaScript · MySQL · MongoDB · AWS S3 · Generative AI APIs · Prompt Engineering · RESTful APIs

- Engineered and scaled AI-powered SaaS platforms serving multiple concurrent clients, integrating 30+ third-party APIs — including OpenAI (ChatGPT), Stable Diffusion, ElevenLabs, Suno Music, Bannerbear, Shotstack, and VanceAI — into production backend systems; leveraged AWS S3 for scalable media storage of generated images and videos, reducing manual media production time by an estimated 70%.
- Architected asynchronous job-handling workflows with retry logic, error handling, and usage-based access throttling — improving platform reliability and supporting consistent uptime for 24/7 SaaS operations.
- Designed and implemented RESTful APIs consumed by frontend teams and third-party clients; enforced authentication, token validation, and role-based access control (RBAC) patterns across all endpoints. Applied prompt engineering techniques to fine-tune LLM outputs for content generation use cases, improving response quality and relevance for end users.
- Built multi-tenant agency management systems using PHP/CodeIgniter and Laravel with hierarchical role permissions, enabling white-label SaaS delivery to agency clients without code duplication.
- Integrated payment IPN flows, SMTP notification pipelines, lead-capture automation, and analytics dashboards — contributing to measurable improvements in user onboarding conversion.
- Conducted peer code reviews and implemented performance optimizations that reduced API response latency and improved application security posture across three SaaS products.
- Collaborated cross-functionally with product managers, UI/UX designers, and QA engineers in an Agile delivery environment, consistently shipping features on schedule.

Web Developer Intern | Alchotech

Nov 2022 – Apr 2023

PHP · JavaScript · HTML · CSS · FFmpeg · MySQL

- Developed full-stack web features for client projects using PHP, JavaScript, HTML5, and CSS3; contributed to 4+ production deployments.

- Implemented video processing pipelines using FFmpeg, enabling automated thumbnail generation and video transcoding within a CMS platform.
- Designed and optimized MySQL database schemas for a content management system, reducing average query response time and improving data integrity.
- Integrated third-party REST APIs to extend platform functionality, supporting richer user experiences across 2 client applications.

KEY PROJECTS

AI-Powered Flipbook PDF SaaS Platform — CodeIgniter 4 · PHP · MySQL · Flipbook.js · REST API

- Architected and built a full-featured multi-tenant SaaS platform enabling users to upload, brand, and publish interactive PDF flipbooks; shipped from zero to production.
- Integrated lead-capture forms, sales automation triggers, SMTP email workflows, and custom analytics — increasing user engagement metrics and supporting a freemium-to-paid conversion funnel.
- Implemented granular role-based permissions for agency-level user management, supporting hierarchical access for admin, sub-admin, and end-user tiers.
- Embedded third-party analytics API for tracking reader engagement (heatmaps, scroll depth, time-on-page) providing actionable SaaS usage data to clients.

AI Music & Voice Generation Platform — CodeIgniter 3 · PHP · MySQL · Uberduck API · Suno Music API · ElevenLabs

- Designed and launched an AI-powered music creation SaaS supporting lyrics generation, rap, freestyle, and voice synthesis — powered by multiple generative AI provider APIs.
- Integrated Uberduck and Suno Music APIs for audio generation with asynchronous job queuing, graceful retries, and per-user usage credit tracking.
- Built secure user authentication, subscription tiers with payment IPN handling, and a full content management dashboard — enabling end-to-end SaaS lifecycle management.
- Reduced API error rate by implementing centralised exception handling and alert logging, improving platform reliability for active users.

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, JavaScript, Python, CodeIgniter 3/4, Node.js, React.js (MERN), HTML5, CSS3, Bootstrap, jQuery

AI & API Integrations: OpenAI / ChatGPT, Stable Diffusion, ElevenLabs, Suno, Uberduck, Prodia, Shotstack, Bannerbear, PlainlyVideos, Play.ht, VanceAI (30+ APIs total)

Databases: MySQL, MongoDB, NoSQL, database schema design, query optimisation

Backend & Architecture: RESTful API design, Async job queues, Webhook/IPN handling, RBAC, Multi-tenant SaaS, MVC pattern, Prompt Engineering, AWS S3 (media storage)

Media & Automation: FFmpeg, image/video rendering pipelines, AWS S3 (storage), SMTP, Payment IPN, API Marketplaces (Kie.ai)

Tools & Practices: Git, Postman, Agile/Scrum, Code Review, Performance Optimisation, Application Security

EDUCATION

Bachelor of Technology — Computer Science & Engineering

2022 – 2025

Gurukul Institute of Technology and Engineering, Kota, Rajasthan

CERTIFICATIONS

- Full Stack Java Developer — Java, JSP, REST APIs, Spring Framework
- Build Your Own Generative AI Model — Hands-on model development and API integration
- Python Programming with MySQL — Data persistence and backend scripting
